

西安交通大学大学英语水平考试（笔试）样题

Part I Listening Comprehension (25 minutes)

Section A (5%)

Directions: *In this section, you will hear two long conversations. At the end of each conversation, you will hear two or three questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

Questions 1 and 2 are based on the conversation you have just heard.

1. [A] He borrowed money from his dad.
[B] He had saved up for a long time.
[C] He spent his birthday money.
[D] He used his own credit card.
2. [A] Changing the credit limit on his credit card.
[B] Explaining to his father the mess he was in.
[C] Finding a way to pay off his credit card debt.
[D] Paying back the money borrowed from his roommates.

Questions 3 to 5 are based on the conversation you have just heard.

3. [A] The first year.
[B] The second year.
[C] The third year.
[D] The fourth year.
4. [A] To apply for graduation.
[B] To have some job interviews.
[C] To attend business lectures.
[D] To register for Paul Jones' class.
5. [A] The man is fed up with Mr. Jones' business class.
[B] Mr. Jones turns out to be the woman's father.
[C] The woman was once in Mr. Jones' class.
[D] Both speakers think highly of Mr. Jones.

Section B (6%)

Directions: *In this section, you will hear recordings of a news report and an announcement, each followed by three questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

Questions 6 to 8 are based on the news report you have just heard.

6. [A] The struggle of a family.
[B] A good deed that saves life.
[C] A call for kidney donation.

- [D] The role of a good father.
7. [A] He lost his eyesight in an accident.
[B] He was hospitalized for an unknown cause.
[C] He underwent kidney transplantation.
[D] He was diagnosed with heart failure.
8. [A] To help take care of the three children.
[B] To call for a donation for the family.
[C] To donate a kidney for the father.
[D] To pay for the father's surgical operation.

Questions 9 to 11 are based on the announcement you have just heard.

9. [A] She got a bachelor's degree from Cambridge.
[B] She was determined to get a Ph.D. in childhood.
[C] She changed her life through higher education.
[D] She used to be a rebellious and spoiled daughter.
10. [A] It is one of the best sellers this year.
[B] It is about Tara's quest for an education.
[C] It is about how to keep good mental health.
[D] It is one of the books that graduates must read.
11. [A] A sales promotion of a best-selling book.
[B] An open lecture by a well-known writer.
[C] This year's event for Tara Westover Book Club.
[D] A relaxing evening social for graduate students.

Section C (16%)

Directions: *In this section, you will hear two passages. At the end of each passage, you will hear four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

Questions 12 to 15 are based on the passage you have just heard.

12. [A] Fresh spring water. [B] Filtered tap water.
[C] Natural source water. [D] Purified well water.
13. [A] To tell the natural source of the water.
[B] To indicate the freshness of the water.
[C] To stress the rarity of the water.
[D] To promote the sale of the water.
14. [A] Dirt from water sources.
[B] Heavy metals in nature.
[C] Bacteria from the handling process.
[D] Chemicals in packaging materials.
15. [A] High price.
[B] Drinking safety.
[C] Misleading labeling.

[D] Environmental pollution.

Questions 16 to 19 are based on the passage you have just heard.

16. [A] Small size of the city.
[B] Too much traffic in the city.
[C] Unique beauty of city streets.
[D] Intention to attract commuters.
17. [A] Widening roads in the city.
[B] Pulling down old buildings.
[C] Extending walking zones to newer neighborhoods.
[D] Set a speed limit of 40 kilometers per hour in the city.
18. [A] Colored lines show the free subway service.
[B] Free parking areas in the city center are marked.
[C] The travel times on foot are shown.
[D] Pink lines show the bus routes to City Square.
19. [A] A walker-friendly map.
[B] A city construction project.
[C] Visitor-attracting measures.
[D] Walker-oriented initiatives.

Section D (8%)

Directions: *In this section, you will hear a lecture. At the end of the lecture, you will hear two questions. Both the lecture and the questions will be spoken only once. After you hear Questions 20 and 21, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center. For Questions 22 and 23, you need to fill in the blanks with the exact words you hear and write the words on the Answer Sheet.*

20. [A] You know what kind of person you are for the first time.
[B] You recognize yourself in the mirror for the first time.
[C] You improve your look in front of a mirror for the first time.
[D] You realize the beauty of your body for the first time.
21. [A] They affect the buildup of teenagers' self-image.
[B] They interfere with teenagers' plans for the future.
[C] They isolate teenagers from the real world.
[D] They encourage teenagers in the virtual life.
22. So there is a _____ between reality and the imaginary world.
23. How much this is _____ not just disappointment but mental health, is something that we're going to discover, probably over the next 10 to 20 years.

Part II Reading Comprehension (35 minutes)

Section A (5%)

Directions: *In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a*

letter. Please mark the corresponding letter for each item on the Answer Sheet with a single line through the center. You may not use any of the words in the bank more than once.

There are countless potential uses of Genetic Engineer (GE) technology in development. These include plants with superior disease and drought resistance, animals with (24) _____ growth properties, and strategies for more efficient medicine production. Likewise, GE technology itself is quickly advancing. Recently, researchers have developed a new technology called CRISPR, which takes advantage of bacterial systems to simplify genetic editing, (25) _____ for easier development of GE organisms. This technology could be used to speed up development of useful GE crops, (26) _____ disease elimination, or even alter entire ecosystems. Interestingly, recent advances in plant breeding techniques may increase the utility of the more traditional GMO (Genetically modified organism) method of selective breeding. Indeed, new drought resistant (27) _____ of various crops have been recently developed using traditional breeding methods.

The United Nations predicts that by 2050, humans will need to produce 70% more food than we (28) _____ do in order to adequately feed the global population. Indeed, (29) _____ approaches will be required to solve this problem, and genetically engineering our food is a (30) _____ useful tool. As scientists look forward at ways to create better crop survival, (31) _____, and nutrition, it is important that we remember where all of this work began, and give credit to the pioneers who have made our advancements possible. Our (32) _____ that selectively bred wolves to eventually develop *Corgis* (威尔士矮脚狗) could not (33) _____ that today we would be able to genetically engineer corn to withstand pests, *herbicides* (除草剂), and drought. What is the future of GMO technology that we ourselves cannot foresee now?

[A] ancestors	[B] allowing	[C] potentially	[D] alternative	[E] foresee
[F] strains	[G] generated	[H] enhanced	[I] eventually	[J] yield
[K] innovative	[L] facilitate	[M] peers	[N] currently	[O] remove

Section B (10%)

Directions: In this section, you will read a passage with ten blanks. You are required to select one sentence for each blank from the fifteen sentences following the passage. Read the passage through carefully before deciding where the sentences would best fit. Each sentence is identified by a letter. Please mark the corresponding letter for each item on the Answer Sheet with a single line through the center.

Interpersonal Relationships in the Digital Workplace

As digital platforms and communications technology have rapidly evolved, teams are no longer limited by geography. But that doesn't mean it's gotten easier to create and maintain healthy interpersonal relationships at work.

Those strong interpersonal relationships are not just a nicety; they're proven to result in stronger, more creative teams, says Alexis Davis, founder and CEO of HK Productions, a digital media company based in New York. "Through healthy interpersonal relationships, team members reduce the risk of feeling lonely, are able to brainstorm, collaborate, share their ideas, creativity and expand point of views. Although we are living in a technologically advanced world, we must

still maintain human interaction, connectivity and support,” Davis says.

(34)_____ Here’s how.

Develop Habits for Strengthening Bonds

There are many tools available to allow for effective communication and coordination between teammates who don’t necessarily work right next to each other or even at the same time. But Erica Keswin, author of the forthcoming book “*Bring Your Human to Work*,” says it’s more important to seek strategies for strengthening bonds rather than focusing on specific platforms.

Instead of worrying about interactive tools, think in terms of *protocols* (方案), Keswin says. (35)_____ For example, she says, she knows one company that’s 100 percent remote. Everyone attends a weekly video conference call.

As Davis says, “These tools can assist leaders in fostering good interpersonal relationships digitally, but leaders must also be intentional in creating a sense of community. When your intention is to help your employees connect, grow, thrive and maximize their full potential, you can begin using technology effectively.”

Encourage Friendships at Work

Some organizations have strict non-*fraternization* (深交, 亲善) clauses for managers or even colleagues. (36)_____

The main way we build friendships at work is by talking about things unrelated to work. Instead of viewing this as unproductive or unprofessional, leaders should encourage people to share the things about their personal lives that they feel comfortable talking about. This may not happen organically among colleagues who work remotely or interact only through email or other technology. (37)_____

“The longest longitudinal study ever done ... found that at the end of your life, the thing that was most correlated with your health and your happiness was the depth and the strength of your relationships,” Keswin says. She also pointed to a *Gallup poll* (盖洛普民意测验) that found that when you have friends at work, engagement goes up and you’re less likely to consider moving to another employer.

(38)_____

Use Technology, but Don’t Hide Behind It

As artificial intelligence and things like robo-advisers become more prevalent, it’s the human parts of jobs that are going to be what actually differentiates performance, Keswin says.

Chunks of required information may work fine in an email, but if you’re trying to get someone’s input or opinion, it’s better to hear their voice or see their face so you can make judgement through their change of voice and expressions. “The tools are the easy part. The best practices can be a bit harder,” says Michelle Broderick, who has experience in bringing remote teams together at Yelp, Uber and Simple.com. Now senior vice president of brand marketing and communications at Automattic, the web development firm behind WordPress, she works with more than 700 colleagues who live in over 60 countries and speak more than 80 languages. “(39)_____ It’s important to honor the importance of human connection, even from afar,” Broderick says.

Foster a Sense of Shared Community

It may not be possible with every organization or every industry, but consider loosening up the *hierarchy* (等级制度) and having less strict concepts of “bosses” and “workers.” Focus on a sense of shared community in which colleagues communicate and collaborate on projects and strategy. (40)_____

In a more personal and balanced workplace, managers are seen less as supervisors who give orders than as facilitators who help employees achieve success and expand their skills. In a digital workplace, that can mean simple things like trust and respect for others' time. "When you are remote, you need to be able to trust that your teammates are going to come through for you even though you might be out of sight and out of mind," Broderick says.

"(41)_____ Are they heads-down working? Are they ignoring you because they are avoiding conflict? Are they hiding because they are embarrassed that they are stuck on a problem? When you encounter silence, you need to be able to trust that your teammate is doing the right thing until you get a response."

Relationships > Knowledge

As people are becoming more and more specialized in their skill sets, there can be fragmentation as people's functions become very different from others'. (42)_____

This leads to looser personal connections. As more routine functions of jobs are taken over by machines, business leaders need to double down on the human equation and empower employees to seek and deepen these bonds. "As AI takes over a lot of work currently performed by people, the main area that will be left as our competitive advantage is the ability to have relationships with each other. Virtual and remote working makes it more difficult to develop the quality relationships we need," Ingham says. "We'll soon need to start thinking less about people as knowledge workers and more about ourselves as relationship workers. (43)_____

- A. So start or end meetings by asking each person to share something personal that has happened to them since the last time they talked.
- B. Creating a sense of community takes discipline, hard work and intentions.
- C. But many experts believe that forming interpersonal bonds is key to employee happiness and engagement.
- D. Relationships are the core aspect of what we do.
- E. Establishing friendships is regarded as killing time and idling.
- F. View each other at eye level instead of through the ups and downs of a rigid organizational chart.
- G. Business leaders must deliberately cultivate those connections.
- H. The focus on groups allows some people to disappear and lose their sense of identity within the organization.
- I. So, talking about non-work-related things is actually a huge benefit in the workplace.
- J. Sometimes people in a co-working space may not even have a clear grasp of what the workers literally sitting across from them are doing.
- K. Reach out to people to see how they're doing — even when you don't need anything from them.
- L. There can be differences in viewing hierarchy in varying countries and cultures.
- M. Leaders should have a strategy for connecting people in the digital workplace.
- N. No one is allowed to look at phones or computers while the meeting is going on.
- O. You also need to trust what their silence might mean at any given time.

Section C (20%)

Directions: *In this section, you will read two passages. Each passage is followed by five*

questions. For each of them there are four choices marked [A], [B], [C] and [D]. You should decide on the best choice and mark the corresponding letter on the Answer Sheet with a single line through the center.

Passage One

Questions 44 to 48 are based on the following passage.

On average, the planet has warmed by around 1.3 degrees Fahrenheit (0.73 degrees Celsius) since the mid-20th century. On particularly freezing winter days, though, you might be less convinced. That's why scientists prefer pointing to 40-year-long trends, i.e. climate trends, when discussing evidence of changing climate. The problem is that weather, which is measured over much shorter time periods, is just so unpredictable. How can you possibly show that our planet's climate is changing from just any random day? Some scientists recently have.

A team of Swiss climate scientists have demonstrated that today's Earth is warmer than during the 1950s-80s—and they can tell by looking at global air temperatures of literally any arbitrary day since 2012. The scientists accounted for natural variability in the climate as well and found that doesn't explain the recent warming. The findings were published this month in the journal *Nature Climate Change*.

Everyone already knows the planet is warming, but this is the first time that scientists have demonstrated that we can detect that warming on a daily basis. Bear in mind, though, that the researchers here cannot just monitor temperature at a random point on Earth to detect climate change in daily weather. Instead, they look at the entire planet at once. To appreciate why looking at global weather is necessary, consider this: weather in a single part of the world is unpredictable, making signs of a warming planet very hard to discern. Though you might be enduring an unusually hot or cold day in your city, it is unlikely the entire planet is suffering the same fate on the very same day. When the scientists look at the Earth as a whole, many of the unpredictable weather patterns in different areas cancel each other out. Because of that, you get a much more predictable trend when you consider all of the weather across the globe. And as the scientists show, a consistent warming trend emerges—daily.

The researchers do not prove, however, how much of climate change's effect on everyday weather is caused by greenhouse gas emissions, such as carbon dioxide from burning fossil fuels. The scientific consensus does point to rapidly rising greenhouse gas emissions as the main cause. But gases are not the only thing that can cause climate impacts. Land-use change alters regional weather patterns, too. So does air pollution. Even so, the fact that climate change can be detected from any single day of global weather leaves many environmental scientists impressed by the innovative science – and concerned by its findings.

44. What does the author want to show by referring to “particularly freezing winter days” in Para. 1?

- [A] Global warming is not convincing.
- [B] Short-term weather is unpredictable.
- [C] 40-year trend is not long enough.
- [D] Recording daily temperature is necessary.

45. What is new in the findings of the Swiss climate scientists?

- [A] The earth today is warmer than decades ago.

- [B] Global warming is more evident after 2012.
[C] Climate change on our planet can be detected on a daily basis.
[D] Global temperature changed dramatically during the 1950s-80s.
46. How did the scientists get a consistent warming trend?
[A] They focused on the temperature at a random point on Earth.
[B] They recorded temperature of the entire planet as a whole.
[C] They eliminated the unpredictable weather patterns.
[D] They recorded the days when the entire planet is hot or cold.
47. What do scientists all agree?
[A] Climate change is caused by burning fossil fuels.
[B] Greenhouse gas is the main cause of climate change.
[C] Land-use change brings about global climate change.
[D] Climate change can be stopped through innovative science.
48. What is the passage mainly about?
[A] A new way to detect climate change.
[B] Different causes of global warming.
[C] The unpredictable climate trend.
[D] Climate change in the last 40 years.

Passage Two

Questions 49 to 53 are based on the following passage.

I've been immersed in the study of friendship for years, and among the many things I've learned, one idea stands out: If you truly want to change some aspect of your life, developing friendships with people who are committed to the same goals as you do can lead to more successful efforts than working alone.

Shortly after we make a decision to change our behavior, we often sense a softening of what at first felt like a firm belief. We scold ourselves for our inability to remain motivated and return to the poor habits we're trying to break, actively undermining our goals. What a frustrating cycle. But research shows that having friends with the same goal can interrupt that cycle.

Researchers have demonstrated that weight loss spreads through friend groups, most likely via a process of altered norms. For example, if you meet your friends at an all-you-can-eat brunch every Sunday, but then one friend starts to beg off after starting a diet, you might suddenly question whether the practice is best for you. If you want to continue to feel close to her, you might even start changing your own routines to ally them more with hers.

The same type of plot is at play with addiction recovery programs. Public health researchers often point out the uselessness of putting a drug addict back into the same social environment after treatment. There it's nearly impossible to resist getting high with the same friends in the same places. Forging new friendships with people who are also determined to stay clean, however, helps establish different patterns and fill the emotional holes that form when one abandons a way of life.

Friends can help you reinforce individual willpower. In *The Power of Habit*, Charles Duhigg recommends replacing the cues that trigger, and the rewards that follow, bad behaviors with new, healthier ones. The cue and reward of a real person knocking on your door for a joint jog, and a stimulating talk over coffee afterwards, is a particularly attractive replacement for whatever previously sucked you into inactive TV watching.

We're all built with the desire to be with, be like, and be liked by friends. We seek out strong bonds with friends on whom our very survival might have once been dependent. While we don't necessarily need friends to help hunt or fight off fierce animals these days, most of us probably still feel like we can't live without them. Tap into that deep-down social motivation and you'll not only be primed for success, but you'll take pleasure in the widely known journey.

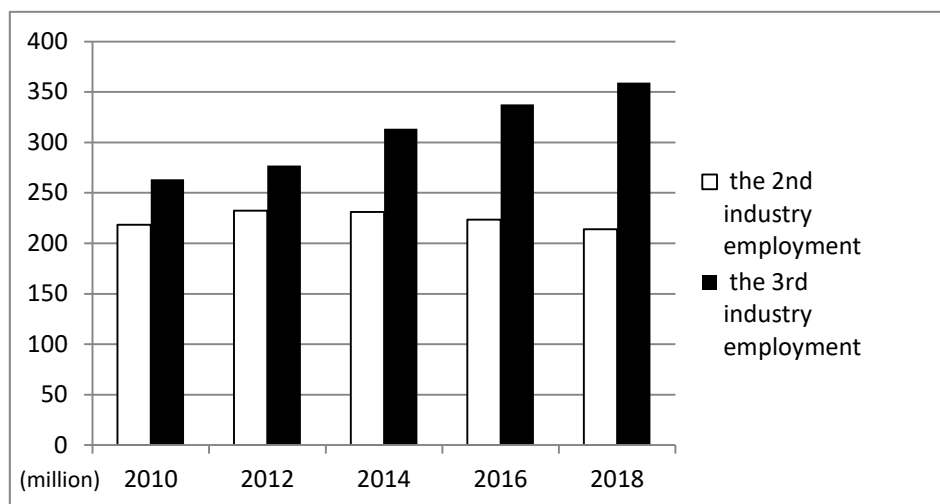

49. What do those who start to change their bad behaviors tend to do?
- [A] Set up clear goals.
 - [B] Motivate themselves.
 - [C] Fall into old habits soon.
 - [D] Make some good friends.
50. How can a drug addict stay clean after treatment?
- [A] By making friends with the same goals.
 - [B] By voicing his frustration to others.
 - [C] By counting on his family for help.
 - [D] By participating in a recovery program.
51. What does Charles Duhigg suggest in his book?
- [A] Filling emotional holes rather than watch TV.
 - [B] Replacing the old temptations with healthier ones.
 - [C] Maintaining regular communication with friends.
 - [D] Taking joint physical exercise more regularly.
52. Which of the following is closest in meaning to "...be primed for..." (Line 5, Para. 6)?
- [A] Be entitled to.
 - [B] Be eager for.
 - [C] Be sensitive to.
 - [D] Be prepared for.
53. What does the author mainly discuss in the article?
- [A] What bad behaviors may be corrected by friendship.
 - [B] Why friendship is still indispensable in modern life.
 - [C] How friendship can make your efforts more successful.
 - [D] Who are more likely to benefit greatly from friendship.

Part III Writing (45 minutes)

Task 1 (5%)

Directions: *For this part, you will write a short essay describing the information in the bar chart below. You should write at least 100 words on the Answer Sheet. Analyzing and commenting are not required in this part.*

The chart below gives information about the employment in the second industry (making products) and the third industry (providing service) in China.

Task 2 (15%)

Directions: *For this part, you will write a short essay commenting on the opinion given below. You should write at least 140 words on the Answer Sheet.*

In China, many parents tend to push their children to choose a college major that will secure a high-salaried job in the future. To what extent do you agree or disagree with these parents?

Part IV Translation (15 minutes)

Directions: *For this part, you will translate a passage from Chinese into English. You should write your answer on the Answer Sheet. (10%)*

传统的丝绸之路以中国古代都城长安为起点，以罗马为终点，全长 6400 多公里。2000 多年前，古老的丝绸之路给沿线各国带来的不仅是贸易和商机，还有文化与社会的交融互通。正是通过丝绸之路，佛教传入了中国，而中国的丝绸、茶叶和瓷器(porcelain)则传遍全球。如今“一带一路”建设必将会给沿线国家带来新的文化交流与经济合作的机遇。

【听力文本】

Part I Listening Comprehension

Section A

Directions: *In this section, you will hear two long conversations. At the end of each conversation, you will hear two or three questions. Both the conversation and the questions will*

be spoken only once. After you hear a question, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center.

Conversation One

Woman: Wow! A new cell phone!

Man: And the Bose headphones.

Woman: You bought them?

Man: Yes, of course. You may try these headphones...

Woman: But where did you get the money to buy all these? You didn't borrow money from your roommates, did you?

Man: Of course not. I got them with this!

Woman: This? Let me see that... Have you been using your Dad's credit card?

Man: No. It's mine. It's a student credit card.

Woman: A student credit card? How in the world did you get one of these?

Man: I got a letter in the mail and applied.

Woman: Well, why did you get one in the first place?

Man: Listen. Having a credit card helps you build a credit rating, control your spending, and even buy things that you can't pay for with cash...

Woman: I don't want to hear it. How does having a student credit card help you control your spending? Student credit cards just lead to impulse spending... as I can see here.

Man: Ah. The credit card has a credit limit of \$10,000.

Woman: I've heard enough. You should know that the interest rates on student credit cards are usually high, and if you miss a payment, the rates just jump!

Man: I won't miss a payment.

Woman: But hang on, even if having a student credit card isn't a bad idea, how in the world are you going to pay off your credit card bill?

Man: Um, with my birthday money? It's coming up in a week.

Woman: Ok, look, let's sit down and talk about how you're going to pay it off, and maybe we can come up with a way to help you get out of this mess.

Questions 1 and 2 are based on the conversation you have just heard.

Question 1. How did the man get the money for the new cell phone and headphones?

Question 2. What does the woman think they should discuss about?

Conversation Two

Man: I wonder if this is going to be an interesting class.

Woman: Yeah. Me too. So, what's your major?

Man: Well, I've been considering going into business, but I haven't decided yet.

Woman: Ah, that's what happened to me my freshman year.

Man: Oh, so what year are you in?

Woman: I'm a senior, and I only have to take 10 more credits to graduate.

Man: Well. That must feel great to be almost finished with school.

Woman: You can say that again, but once I graduate, I have to struggle in the job market and live by myself. Isn't it scary?

Man: Well, you know, at least you see the light at the end of the tunnel.

Woman: That's true.

Man: Well, have you found a job yet?

Woman: Not yet, but I'm trying to arrange for a few interviews at the job fair next month.

Man: Well, at least you have some ideas about your future. I mean, I'm taking a business class right now, and the teacher always lectures us by saying that life is difficult, and we should prepare for our futures by setting realistic goals.

Woman: ...And the only place that success comes before work is in the dictionary. Yeah. I've heard all that before. Let me guess. Is your teacher Paul Jones?

Man: Yeah. How do you know?

Woman: I attended his class last year.

Man: Oh, he's a good teacher, but don't you think he is just like a dad, lecturing a lot.

Woman: Yeah, he has about a thousand moral stories about life, and he always shares them in his classes.

Man: Yeah. Well, um . . . , nice talking with you. I have to go.

Woman: Same here. Bye.

Questions 3 to 5 are based on the conversation you have just heard.

Question 3. What year in college is the man in?

Question 4. What does the woman plan to do next month?

Question 5. What do we learn at the end of the conversation?

Section B

Directions: *In this section, you will hear recordings of a news report and an announcement, each followed by three questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

News Report

A principal in Texas proved that age, gender and race are no obstacles when it comes to fulfilling a life-saving good deed.

Sarah Schecter, head of the Oakridge School in Arlington, donated her kidney to Nate Nickle, a parent whose three children attend the school and who was in desperate need of a transplant, according to ABC News Dallas affiliate WFAA.

The educator said being generous, kind and brave are all "a big part" of what the school teaches its students, along with talking to them about character.

Nickle told WFAA that he noticed a change in his eyesight that progressed quickly. He was diagnosed with acute kidney failure and was informed that a transplant was his only option.

Nickle's wife said she mentioned his diagnosis to their children's teachers and the principal in case it distracted them from their studies in class.

After several months, the school head told Nickle's wife that she wanted to be tested to find out if she could be a donor for her husband. She said, "Am I still scared? Yes. But to think they could lose their dad when they're just kids in school, I just want them to have their dad."

Schecter was a perfect match and the transplant operation was successfully completed on Jan. 13 at UT Southwestern Medical Center.

The medical center captured a video of Schecter and Nate Nickle when they saw each other

for the first time post-surgery. The pair embraced in a tearful moment of relief and gratitude.

Questions 6 to 8 are based on the news report you have just heard.

Question6. What is the news mainly about?

Question7. What happened to Nickle, a parent of three students?

Question8. What did the principal of the Oakridge School offer to do?

Announcement

Campus Read engages the campuses and community in a common reading experience, which fosters dialog, critical thinking and community participation. This year's Campus Read is about a young woman who did not have a formal education but enrolled at Brigham Young University and was transformed by the experience of getting a bachelor's degree. College changed everything about her life including her relationship with her family. Her quest for an education often feels like a rebellion against her family and her upbringing. Then she goes on to graduate school where she succeeds beyond her wildest expectations by getting a Ph.D. from Cambridge.

But her journey was not an easy one. She writes about her fears, her struggle with mental health and her feelings of inadequacy that persist even as she's successful. Her life is changed by the students and professors she meets along the way. Her book *Educated* was one of the bestselling books last year and has continued to be popular even now, despite being released over a year ago. Her book has sparked a lot of conversation and she'll be on campus November 11 to discuss it.

We're inviting graduate students to come out for a meal and some conversation about their own journey to become educated on Thursday, November 7, 5:30-7 p.m. in the East Moore Hall lounge. If you didn't read the book written by Tara Westover, no problem. It's an evening to talk about what it means to be EDUCATED.

Please reply by logging onto our website, ResponsePage, and fill in the information as required, so we'll know how many students will come and have enough food on hand.

Questions 9 to 11 are based on the announcement you have just heard.

Question9. What do we know about Tara Westover?

Question10. What is true of the book *Educated*?

Question11. What is the announcement mainly about?

Section C

Directions: *In this section, you will hear two passages. At the end of each passage, you will hear four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center.*

Passage One

Bottled water offers a quick drink option and can be found almost everywhere. There are generally two types of bottled water in terms of water sources. Much of what you see on store shelves is purified water or drinking water, and it's actually nothing more than filtered tap water. The other type of bottled water comes from natural sources. If you want to make sure you're

buying water that comes from a natural source, look for the labels such as “spring water” or “well water.”

Well water comes from the underground, while spring water comes from surface water. The main point is that these waters did not go through a water treatment plant. Well and spring waters still must meet FDA water quality standards and may be filtered to make them safe to drink.

If you come across bottled water that is labeled or branded as “mountain water” or “glacier water,” please know that these are often used for marketing purposes—to help attract you to buy it, but the water inside the bottle has likely never touched a mountain or glacier. In these cases, look on the label to find the water source.

Then, is bottled water safe? Yes. Plain bottled water itself is generally safe to drink, but because of the handling and packaging process, bacteria are likely to get into the water and make it unfit to drink.

For the consumer, there are some definite advantages to choosing bottled water. However, in our opinion, the drawbacks seem to outweigh those advantages. Bottled water is much more expensive than tap water, but the biggest concern about bottled water is the environmental problem the plastic bottles can cause. So, we won’t recommend it as a better option.

Questions 12 to 15 are based on the passage you have just heard.

Question 12. What is much of the bottled water on store shelves?

Question 13. Why is bottled water often labeled as “glacier water”?

Question 14. What may make bottled water unfit to drink?

Question 15. What does the speaker think is the biggest concern about bottled water?

Passage Two

The city of Pontevedra in Spain has become a leader in walker-friendly urban policy over the past 15 years. In light of its relative namelessness and population of 83,000, one might find it difficult to imagine the traffic jam that led to this transformation. However, as the capital of its province, Pontevedra attracted enough automobile commuters each day to overwhelm its aged streets.

Instead of pulling down old buildings and constructing bigger roads, the city council began taking measures to reduce traffic. They widened sidewalks, established a free bike-lending service, and set a speed limit of 30 kilometers per hour throughout the city. They even banned motorized transport in sections of Pontevedra. Walking zones now extend from the historic center to streets and squares in newer neighborhoods.

To further improve walkability, Pontevedra’s city council produced a map that shows the distances and travel times between key places on foot. The map has color-coded lines that resemble those of a subway guide. The pink line from City Square shows that it takes about 14 minutes to walk from there to the train and bus stations. Free parking areas are marked to encourage visitors to leave their cars outside the city center. According to the map, someone who parks in the free lot near the police station can get to City Square in less than eight minutes. The map reminds residents and visitors that many automobile trips can be made in a more convenient, environmentally friendly and healthy way by walking.

The map initiative and urban restructuring program have earned honors from European and national organizations.

Pontevedra’s walker-oriented initiatives raise questions as to how they came into being and

how they've influenced living conditions in the city. Researching these questions would offer insights into the potential for similar initiatives in other cities around the world.

Questions 16 to 19 are based on the passage you have just heard.

Question 16. What led to the idea of transforming Pontevedra into a walker-friendly city?

Question 17. What measures did the city council take to make Pontevedra walker-friendly?

Question 18. What do we learn about the new map?

Question 19. What is the passage mainly about?

Section D

Directions: *In this section, you will hear a lecture. At the end of the lecture, you will hear two questions. Both the lecture and the questions will be spoken only once. After you hear Questions 20 and 21, you must choose the best answer from the four choices marked [A], [B], [C] and [D]. Then mark the corresponding letter on the Answer Sheet with a single line through the center. For Questions 22 and 23, you need to fill in the blanks with the exact words you hear and write the words on the Answer Sheet.*

In this lecture, we are looking at how internet and games affect the teenage mind.

There is an issue about the development of what I would call identity. The psychoanalyst Jacques Lacan talks about the 'mirror stage', as a key phase in the development of personality. This mirror stage is when a young child, for the first time, recognizes himself or herself in the mirror. And it is a very important moment because before that you had a sense of yourself but then you start to assume an image. I mean you become aware that what you see in the mirror is what others see of you. This image, you can manipulate, you can dress up, you can put some makeup on yourself. There is something you can change, which is the reality of your body – how tall you are, how blonde, or dark haired, how muscular, how pretty. You negotiate something with that sense of reality. One of the problems that we see now is that when you are dealing with friends through the internet, very often you can manipulate this image, you can change it. And the extreme example is represented by some games in which you are actually on screen. You are an electronic creature, and the quality of this creature, you determine, you invent. And it is very possible that the very nature of the electronic media is having an impact on the developments of the image of yourself, what you expect of yourself, your value, but also your hopes, your plans, your expectations in life. How could you deal with the change that this involves? There is a massive disappointment then in reality when, having been a world champion footballer on FIFA game, then suddenly you can't kick a ball. So suddenly you discover that to be as good as you thought, you're going to have to work, to discover and to accept that you don't know, which is the first step towards knowledge. So, there is a divorce between reality and the imaginary world. This divorce always existed but, in the past, the reality principle brought you back to a more humble or realistic position. Nowadays, there is an enormous amount of frustration because what you have experienced as a real life but is in fact a virtual life, does not fit your experience of your real life. How much this is connected with not just disappointment but mental health, is something that we're going to discover, probably over the next 10 to 20 years, but it's very important that professionals start to think about this modification already now.

Questions 20 to 23 are based on the lecture you have just heard.

Question 20. What happens in the “mirror stage”?

Question 21. How do internet and games affect teenagers?

Now please finish Question 22 and Question 23.

That is the end of Listening Comprehension.

【参考答案】

Part I Listening Comprehension (共 35 分)

Section A (每题 1 分, 共 5 分)

1. D 2. C 3. A 4. B 5. C

Section B (每题 1 分, 共 6 分)

6. B 7. C 8. C 9. C 10. B 11. D

Section C (每题 2 分, 共 16 分)

12. B 13. D 14. C 15. D 16. B 17. C 18. C 19. D

Section D (每题 2 分, 共 8 分)

20. B 21. A

22. divorce (2 分)

23. connected with (每词 1 分)

Part II Reading Comprehension (共 35 分)

Section A (每题 0.5 分, 共 5 分)

24. H 25. B 26. L 27. F 28. N

29. K 30. C 31. J 32. A 33. E

Section B (每题 1 分, 共 10 分)

34. G 35. M 36. C 37. A 38. I

39. K 40. F 41. O 42. J 43. D

Section C (每题 2 分, 共 20 分)

44. B 45. C 46. B 47. B 48. A

49. C 50. A 51. B 52. D 53. C

Part III Writing (共 20 分)

Part IV Translation (共 10 分)

参考译文:

The traditional Silk Road stretched 6400 km from Chang'an, the capital city of ancient China, to Rome. Over 2000 years ago, the ancient road brought about not only trade and business opportunities, but also cultural and social interaction for countries along it. It was via the Silk Road that Buddhism was introduced to China, while Chinese silk, tea and porcelain found their way to every corner of the world. Today, the Belt and Road Initiative will create new opportunities for cultural communication and economic cooperation for all the countries involved.
